Vinchen Amigo
(Vincent)

About Me

Dedicated Programmer, Passionate Developer

I was an Apple Developer Academy graduate that brings two years of experience as a full-stack developer with a strong focus on full-stack web development. I am proficient in JavaScript, PHP, and Laravel, and have hands-on experience in web hosting and version control using Git. Additionally, I am passionate about creating innovative solutions across multiple platforms, including iOS development with Swift, SwiftUI, and UIKit. My skill set also extends to game development using Unity and C#, where I design and build engaging, interactive experiences.

Cleonima invitation:

Bringing your invitations to life

Project Description

Cleonima Invitation is a platform designed to simplify sweet seventeen birthday celebrations. Currently, I'm developing 16 custom, responsive websites that allow easy broadcasting of invitations, RSVP management via WhatsApp API, and gathering guests' wishes for the client. With a focus on user-friendly design, Cleonima Invitation enhances event planning by providing an efficient and interactive experience for both the client and guests.

Working year

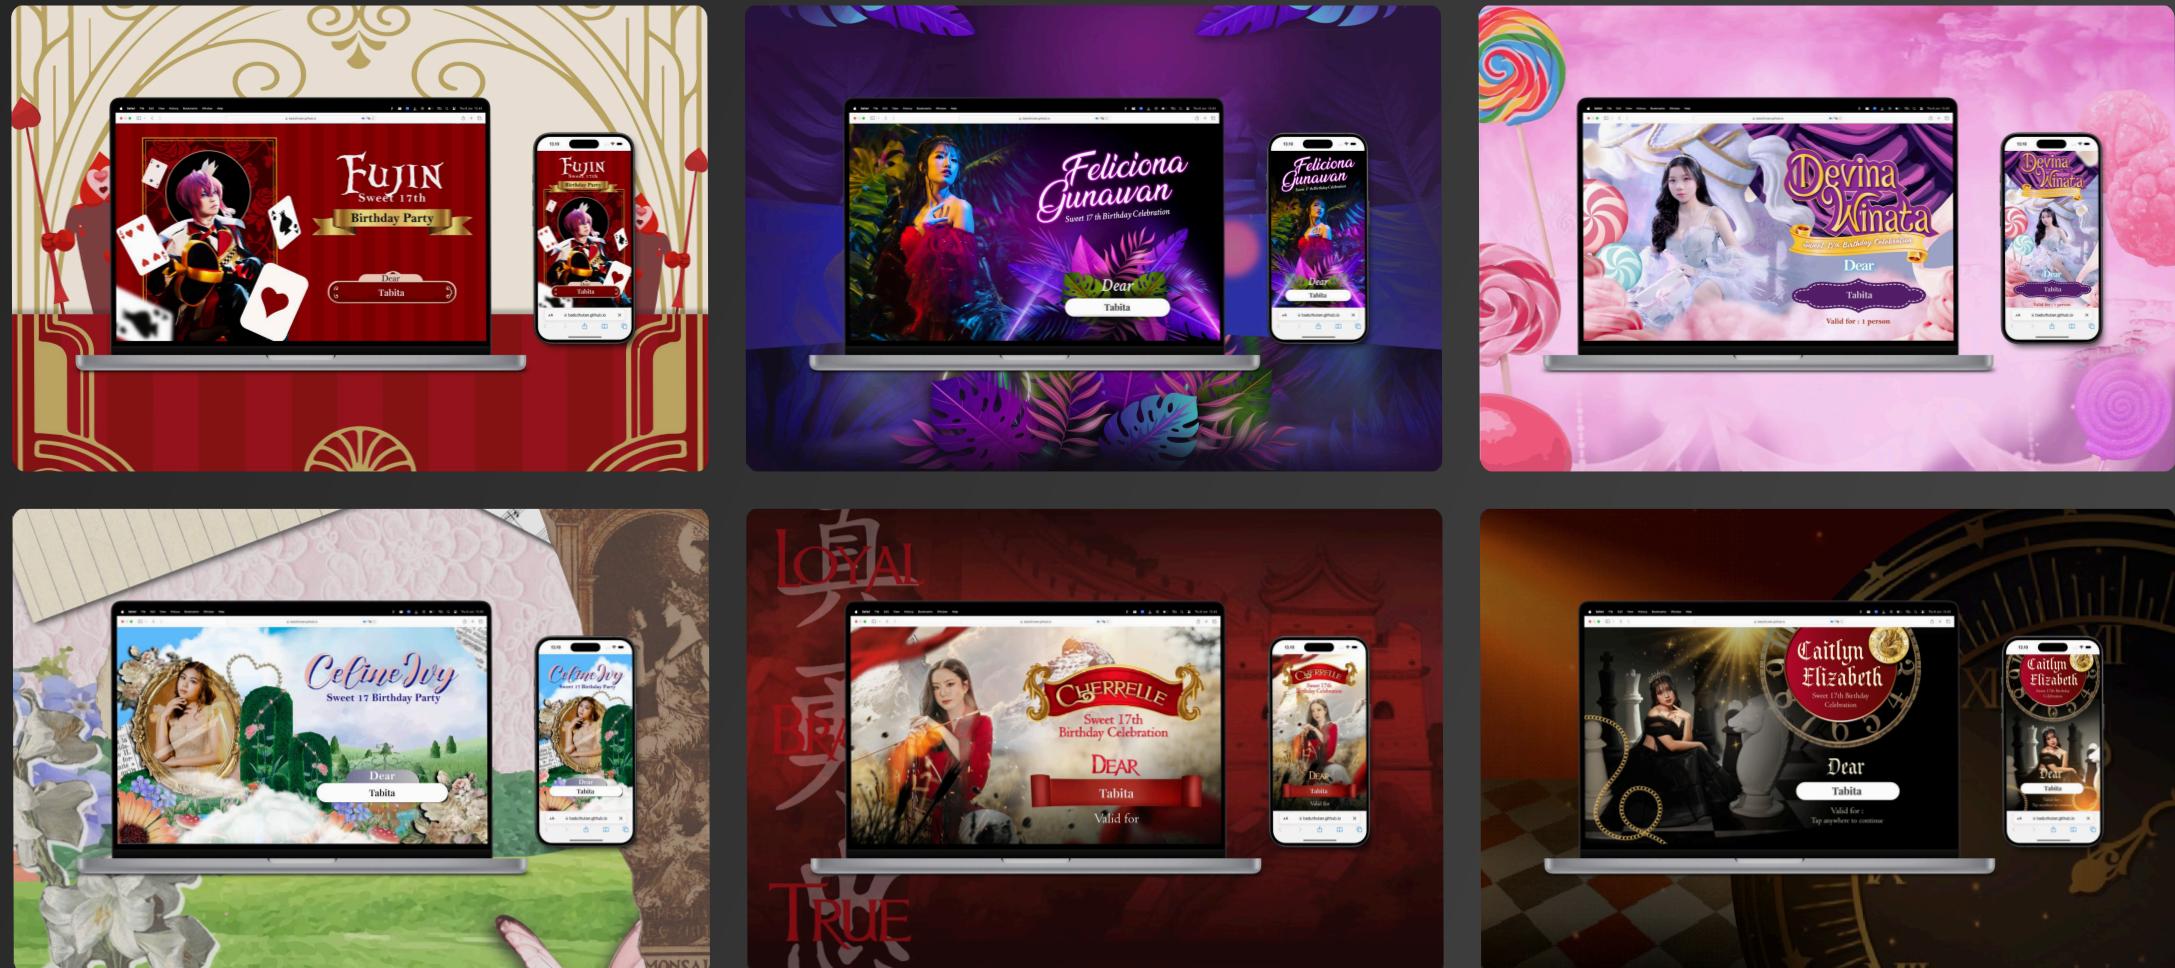

2023 - present

Tech Stack

</> PHP, JavaScript
⛓ Laravel, TailwindCSS, JQuery
🔧 Vscode, Github, Cpanel

Architechture

MVC design pattern,
Blade frontend,
MySQL Database

Features

Admin panel, Dynamic content for each guest website,
Wish form, picture gallery, venue link to google maps,
RSVP using WhatsApp API with prompt

BiMeal:

Food pre-order website

Project Description

BiMeal is a technology to provide the buyer to pre-order meals before picking it later to avoid amount of time wasted for queueing meals at canteen busy hours. In addition, BiMeal provides the information of if your favorite menu is available or not. Cool, isn't it? More than that, BiMeal ease merchants to manage their menu, make promos, etc. Handy! BiMeal is a website made with Laravel API and Vue.js.

Srgepp:

AI powered to-do list management website

Project Description

Srgepp is a website designed to boost your productivity by intelligently managing your to-do lists. By leveraging K-means clustering AI, the platform analyzes your tasks and segments them based on their difficulty level, ensures you're always focused on what matters most. Built with Laravel and PHP-Machine Learning, this website combines advanced technology with a user-friendly interface to enhance your daily workflow.

Architecture

MVC design pattern,
Blade frontend,
MySQL Database

Features

Google authentication, task clustering by deadline and difficulty, task breakdown kanban

Bina Insan:
Kindergarten
children monitoring
website

Project Description

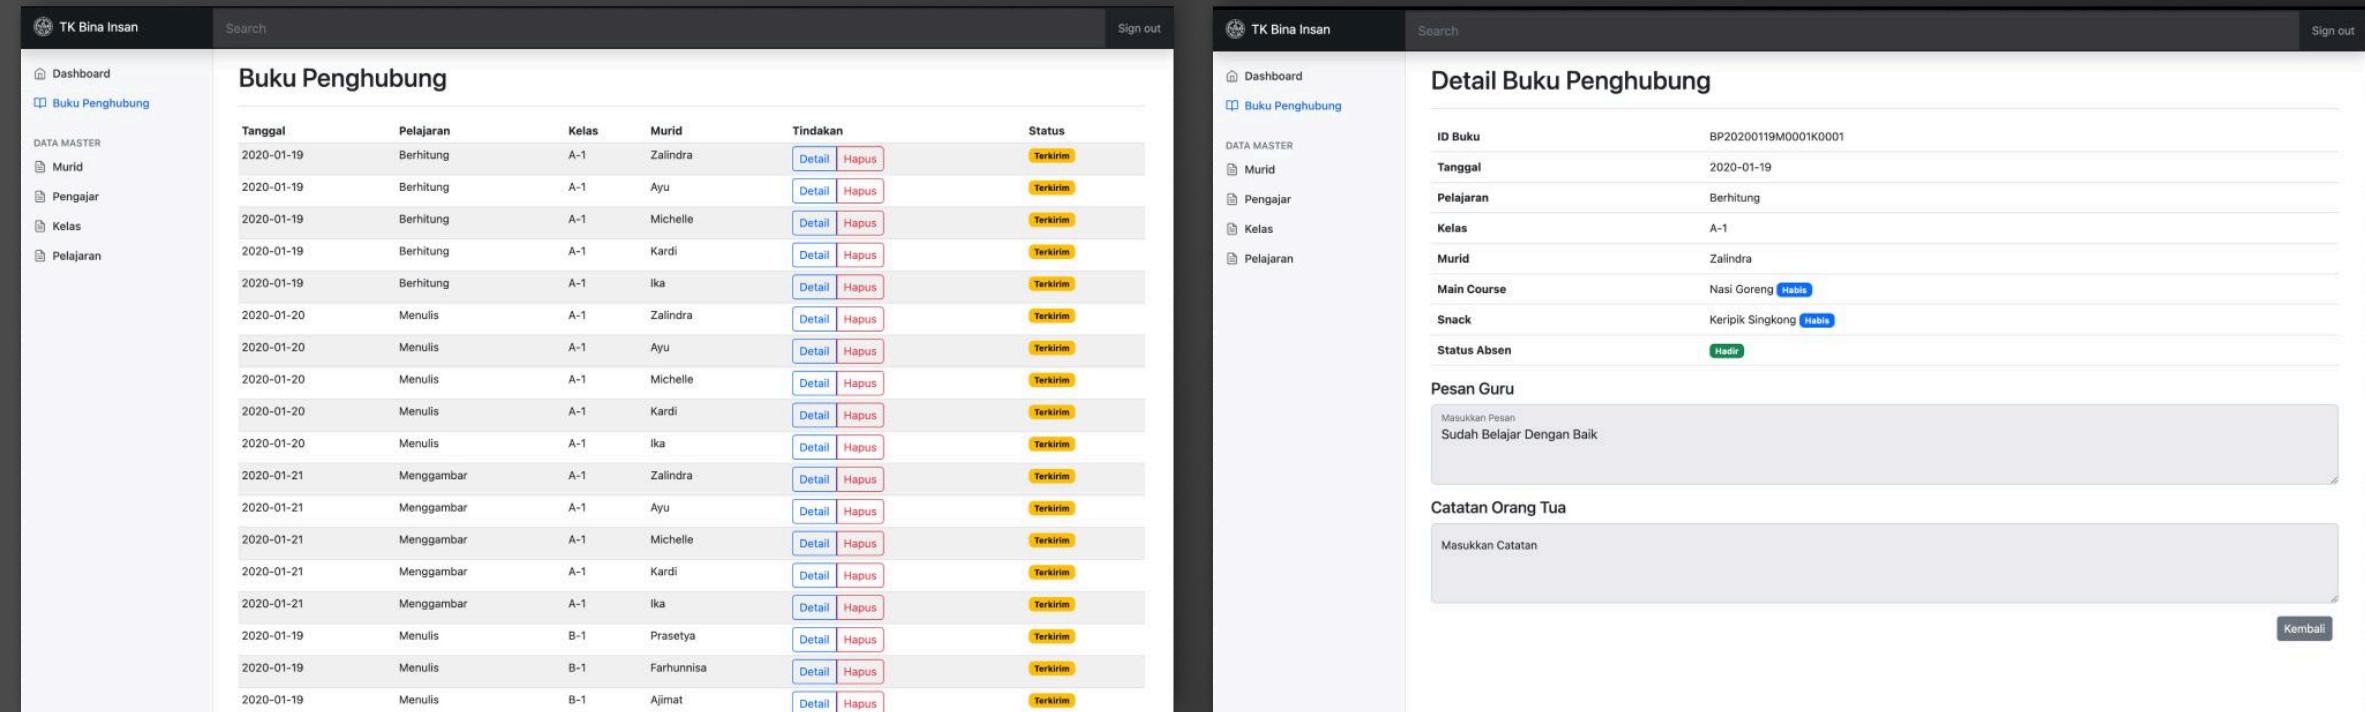

This website was created to streamline communication between kindergarten teachers and parents by reporting students' daily activities. It allows teachers to leave notes for each student, providing detailed insights into their day. Parents can then provide feedback to the teacher, creating a two-way communication channel. This website serves as a vital bridge between parents and teachers, ensuring that both parties stay informed and engaged.

Full-stack Developer

Tech Stack

</> PHP, JavaScript
⛓ Laravel, TailwindCSS, JQuery
🔧 Vscode, Github, Cpanel

Architechture

MVC design pattern,
Blade frontend,
MySQL Database

Features

Multi role authentication (teacher, parentm and admin), List of student reports, student report detail, parent-teacher message per daily report, data master for admin.

Beleaf Ecoprint:

Company profile website

Project Description

Beleaf is an eco-friendly startup that needed a website redesign to better align with its values and engage customers. So, I completed the redesign using the Wix website builder, creating a clean, modern aesthetic that reflects the brand's commitment to sustainability. Beleaf's new website is both stylish and functional, making it a great tool for growing their online presence!
